Introduction

DieselNet is the online information service on clean diesel engines and diesel emissions.

Subject Coverage

It is the Internet forum for the exchange of technical and business information on engines, emissions, emission control, and all related issues for the development of the clean diesel engine of the future.

Accessing Documents

DieselNet has two levels of access:

- Public Access: Documents in this area are accessible for all DieselNet visitors.
- Subscriber Access: To access the subscriber’s documents, please go to DieselNet at http://library.vtc.edu.hk/english/eres/edb.htm.
