VTC WiFi Setup information

Visit VTC WiFi Setup for detailed instructions.

http://wlan.vtc.edu.hk/Setup.html

Select the appropriate network and follow the Android setup steps using your VTC credentials.
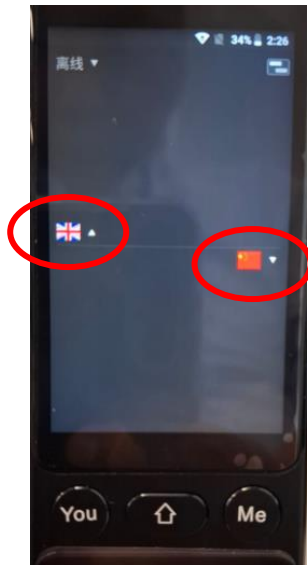

Quick Start for verbal translation

Note: Ensure your device is connected to the internet for online translations.

First-time offline translation requires network activation.

1) Select "Translate" in the main menu

2) Select Languages

Choose your source language (the language you will speak) and target language (the language you want to translate to).

3) Start Recording

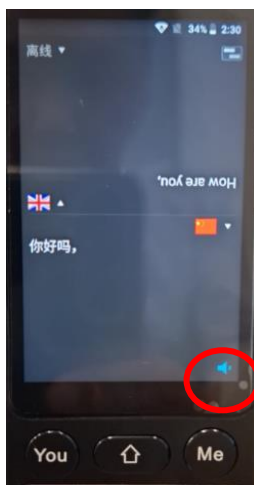

Press and hold the YOU key or ME key to start recording your speech.

4) Generate Translation

Release the key after speaking. The device will generate the translated text.
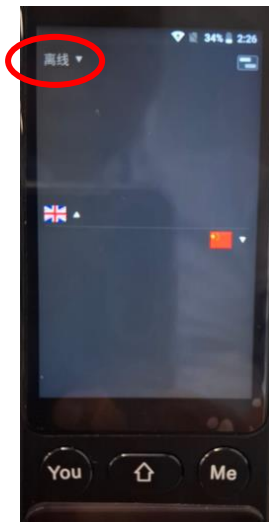

5) Listen to Translation

The device will automatically play an audio version of the translated text.
Or
Click the pause/play button to control audio playback.

6) Online and Offline Modes

Switch Modes: Use the button at the top left to toggle between "Online" and "Offline" translation.

7) Exchange Languages

Quickly swap source and target languages using the exchange button.
